

Great Whelnetham Church of England Primary School

British Science Week 9th to 18th March 2018

1st March 2018

Dear Parents

I am extremely excited to announce that as part of our Science week we will be running a whole school enrichment day on Tuesday 13th March. As budding scientists I would like the children to dress up as 'mad scientists' for the day! To give you an idea I have included some examples below!

The children will be in mixed year group teams carrying out various experiments such as making putty, writing using invisible ink, erupting volcanoes, launching rockets and making bubbles!

On Wednesday 14th March Year 4 will be going to King Edward Upper School, where they will be watching some exciting displays in Biology, Chemistry and Physics! Further details with permission slips will follow.

On Thursday 15th March we have a special guest in school demonstrating some robotics! This supports our celebration of science, technology, engineering and maths and could lead to the possibility of us being able to offer an after school robotics club.

In addition I would like to let you know that the Bury St Edmunds All Through Trust are offering a community STEM festival on Saturday 17th March giving parents the opportunity to share the fun with their children. For further information please phone Nadine on 01284 754857.

I am looking forward to seeing the children working scientifically!

Many thanks for your continued support.

Claire Masson

Science Coordinator
